

MACROSPEC IS

Sequestering iron salt EDTA

MACROSPEC IS is a high efficiency sequestering iron salt.

Properties

MACROSPEC IS is an EDTA-based (Ethylenediamine tetraacetic acid) organic complexing agent with highly powerful action on iron which eliminates the stains caused by this metal. **MACROSPEC IS** acts on water hardness turning water soft. It also solubilises precipitated metallic hydroxides.

Typical Analysis

Physical aspect: White hygroscopic powder

Ionic character: Anionic

PCP: Free

EDTA content (%): 86 - Minimum

pH (Aqueous Sol. 1% w/v): 10.0 - Minimum

Application

It is recommended to use **MACROSPEC IS** as follows:

In tanning

0.3 - 0.5% calculated on the weight of the limed pelts

In retanning

0.3 - 0.5% calculated on the weight of the limed pelts

Storage

MACROSPEC IS must be stored in tightly closed packaging in a clean, dry, aired place protected from sunlight for a period not exceeding twelve (12) months.

Presentation

MACROSPEC IS is available in powder form, packed in 25 kg bags (net weight). It may also be supplied in bulk or pallets.

Toxicological Information

Please refer to the relevant **MSDS** (Material Safety Data Sheet) which may be found in our website. Alternatively, please contact our Sales Department.
